### Alco 251 Diesel Engine Maintenance

The Alco 251 is a 4-stroke diesel engine that was developed by the American Locomotive Company to replace the 244 and 539 engines. The 251 was developed to be used in diesel locomotives, as a marine power plant in ships and as a stationary power generator

**ALCO 251 - Wikipedia**  
The American Locomotive Company's (Alco) model 251 prime mover would be the last diesel engine the manufacturer ever put into production. The power plant was conceived purely out of necessity due to the problems and failures of the earlier 244, which had powered its first FA and PA cab models designed for main line service.

The American Locomotive Company's model 244 prime mover was developed during the mid-1940s to power its post-war diesel locomotives. Interestingly, while Alco helped pioneer diesel technology dating back to the 1920s it had difficulty truly competing against Electro-Motive due to reliability issues with its diesel engines.

**Alco 244 - American-Rails.com**  
Service history. The FAs, as well as their cousins, the ALCO PAs, were born as a result of Alco's development of a new diesel engine design, the Model 244.In early 1944, development started on the new design, and by November 1945, the first engines were beginning to undergo tests.
