Nikon TMS Inverted Phase Contrast Microscope The Nikon TMS Inverted Phase Contrast Microscope produces high quality images for tissue culture labs, readily meeting biological and metallurgical research needs. This Nikon microscope offers simple operation with an easy-to-maintain inverted microscope frame.

### Nikon TMS Inverted Phase Contrast Microscope | Marshall ...

The Nikon TMS is a widely used inverted microscope that is found in tissue culture laboratories around the world. Although the more advanced Eclipse TE200 and TE300 models feature infinity-corrected optics, the TMS, which was first released in the mid-1980s, still produces high quality images that meet the critical needs of most biological and metallurgical research.
