Oracle® Enterprise Manager Ops Center Updating Your Oracle ...

In March 2010, the previously freely available Solaris 10 was placed under a restrictive license that limited the use, modification and redistribution of the operating system. The license allowed the user to download the operating system free of charge, through the Oracle Technology Network, and use it for a 90-day trial period. After that trial period had expired the user would then have to purchase a support contract from Oracle to continue using the operating system.

Solaris (operating system) - Wikipedia

Oracle Solaris 11 and 10 WAN Boot require that dealias net is aliased to the proper device. The default uses the first NIC. Some option-card NIC devices, such as 10 GbE, are not automatically aliased. To add a net entry, such as net4, you must re-alias net to the right side of the net device that you want.
