technology. Information is also available about Peterbilt rebate programs. View Brochures & Information

Resources & Support | Peterbilt

Code 51 is a ECM battery power intermitant. I see this code a lot. This code can happen just by cycling the key switch quickly. Code 51 is most often logged and no problem. Trust me. If there was a power supply problem to the ECM, the engine would not run. Code 36 is a vehicle speed sensor circuit fault.
